

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

IN CERTAIN STATES AND CITIES.

SMALLPOX.

California—Angel Island Quarantine.

Asst. Surg. Thometz, of the Public Health Service, reported by telegraph that on March 29, 1914, a case of smallpox, in a Chinese steerage passenger, had been removed from the steamship *Siberia*.

California—Oakland and San Francisco.

Surg. Long, of the Public Health Service, reported by telegraph that during the week ended March 28, 1914, two cases of smallpox had been notified in Oakland and seven cases in San Francisco, Cal.

Indiana—Evansville.

Surg. Oakley, of the Public Health Service, reported by telegraph that during the week ended March 28, 1914, 14 cases of smallpox had been notified in Evansville, Ind.

Maryland—Baltimore.

Senior Surg. Carter, of the Public Health Service, reported by telegraph that during the week ended March 27, 1914, 24 cases of smallpox had been notified in Baltimore, Md., making a total of 196 cases reported since January 11, 1914.

Maryland—Bladensburg.

The State Board of Health of Maryland reported by telegraph March 30, 1914, that 2 cases of smallpox had been notified at Bladensburg, Prince George County, Md.

Maryland—Chestertown.

The State Board of Health of Maryland reported by telegraph, March 31, 1914, that one case of smallpox had been notified at Chestertown, Kent County, Md.

SMALLPOX—Continued.

Minnesota—Duluth.

Acting Asst. Surg. Cheney, of the Public Health Service, reported by telegraph that during the week ended March 28, 1914, five cases of smallpox had been notified in Duluth, Minn.

New York—Niagara Falls—Epidemic Ended.

Acting Asst. Surg. Bingham, of the Public Health Service, reported, March 28, 1914, that the recent epidemic of smallpox at Niagara Falls, N. Y., was at an end. From November 3, 1913, to March 11, 1914, 458 cases with 1 death were notified to the local health office.

Texas—Galveston.

Surg. Bahrenburg, of the Public Health Service, reported by telegraph that during the week ended March 27, 1914, 15 cases of smallpox had been notified in Galveston, Tex., making a total of 42 cases reported since February 6, 1914.
